Draft, pending approval

Weekly analysis

Reporting period	2010-W47
Data as of	2010-11-28
Prepared for	ops@example.com
Report version	1

Executive summary

Return rate moved up led by EIRE registered

Recommended action. Review the affected segments with the owning team

return_rate	revenue
0.01	**314,821.68**
vs prior: -0.00	vs prior: -44,366.91
vs baseline: no baseline	vs baseline: no baseline

Key findings

return_rate: EIRE / registered (0.07): Return rate moved up in EIRE registered
return_rate: Germany / registered (0.01): Return rate moved down in Germany registered
revenue: EIRE / registered (2,321.56): Revenue moved down in EIRE registered

Findings

Finding 1: return_rate: EIRE / registered

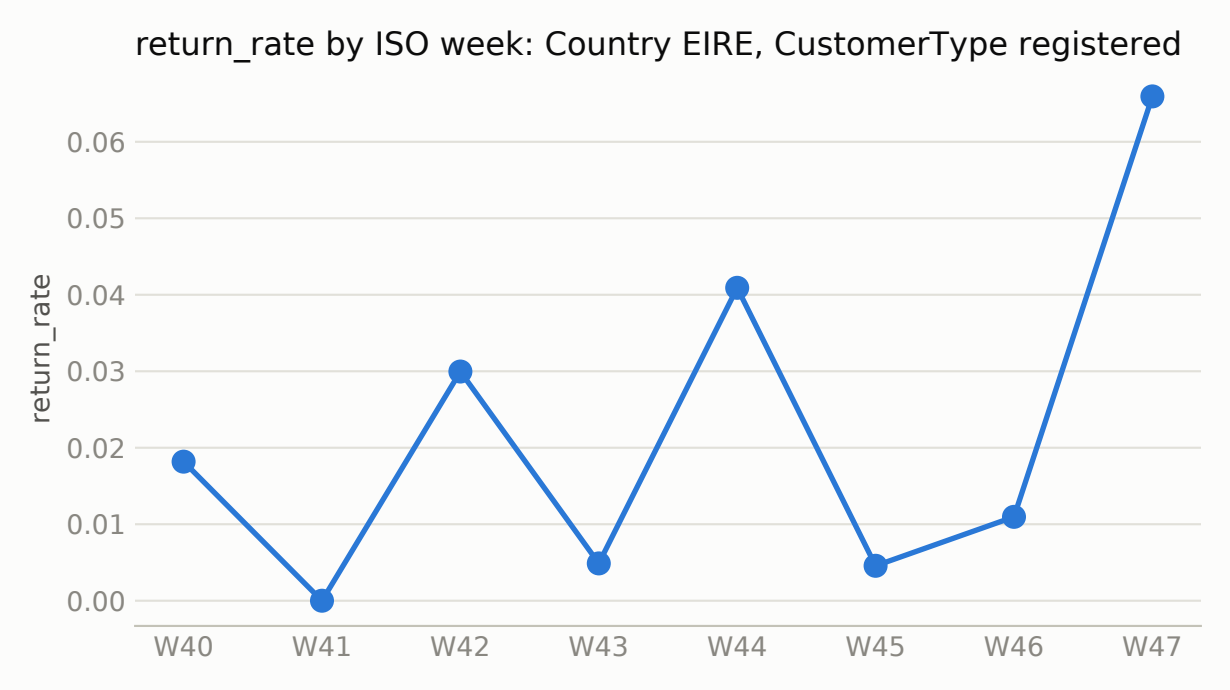

Chart description: Line of return_rate by ISO week for Country EIRE, CustomerType registered; the latest week is last.

Segment	Change
Germany	-0.08
Other	+0.00
France	-0.00
EIRE	+0.06
United_Kingdom	-0.00

Interpretation
Each row is one Country segment and its own change in return_rate from the prior week.

Finding 2: return_rate: Germany / registered

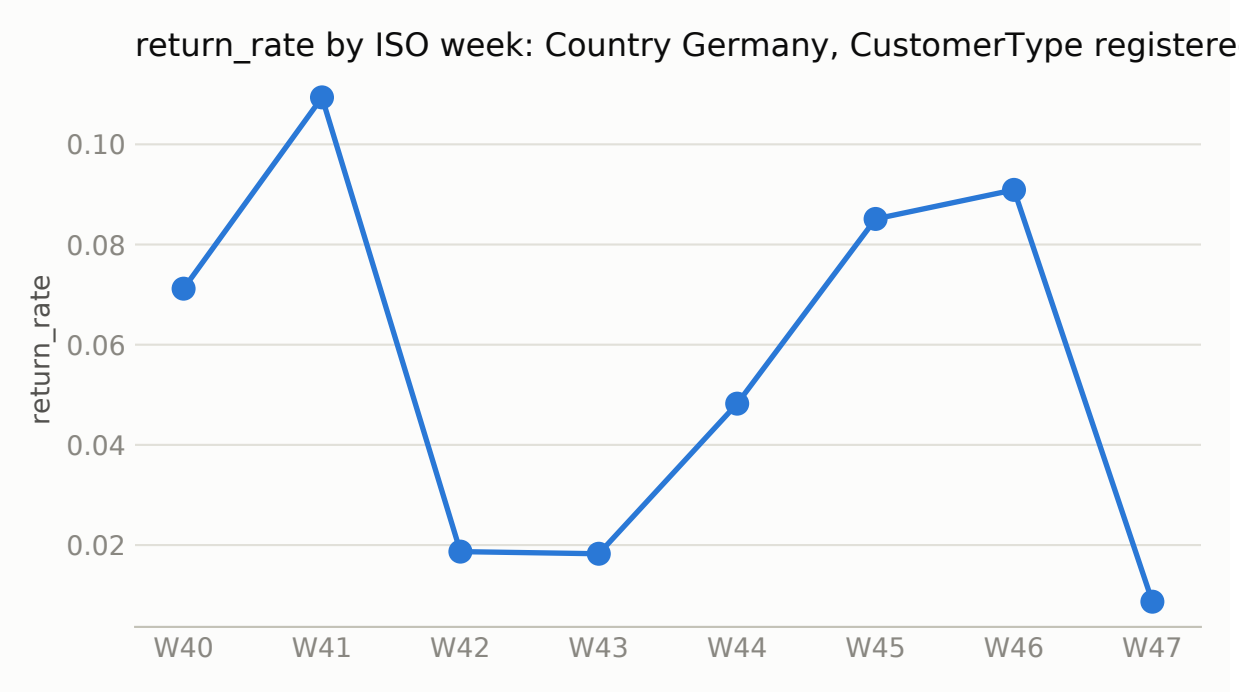

Chart description: Line of return_rate by ISO week for Country Germany, CustomerType registered; the latest week is last.

Segment	Change
Germany	-0.08
Other	+0.00
France	-0.00
EIRE	+0.06
United_Kingdom	-0.00

Interpretation
Each row is one Country segment and its own change in return_rate from the prior week.

Finding 3: revenue: EIRE / registered

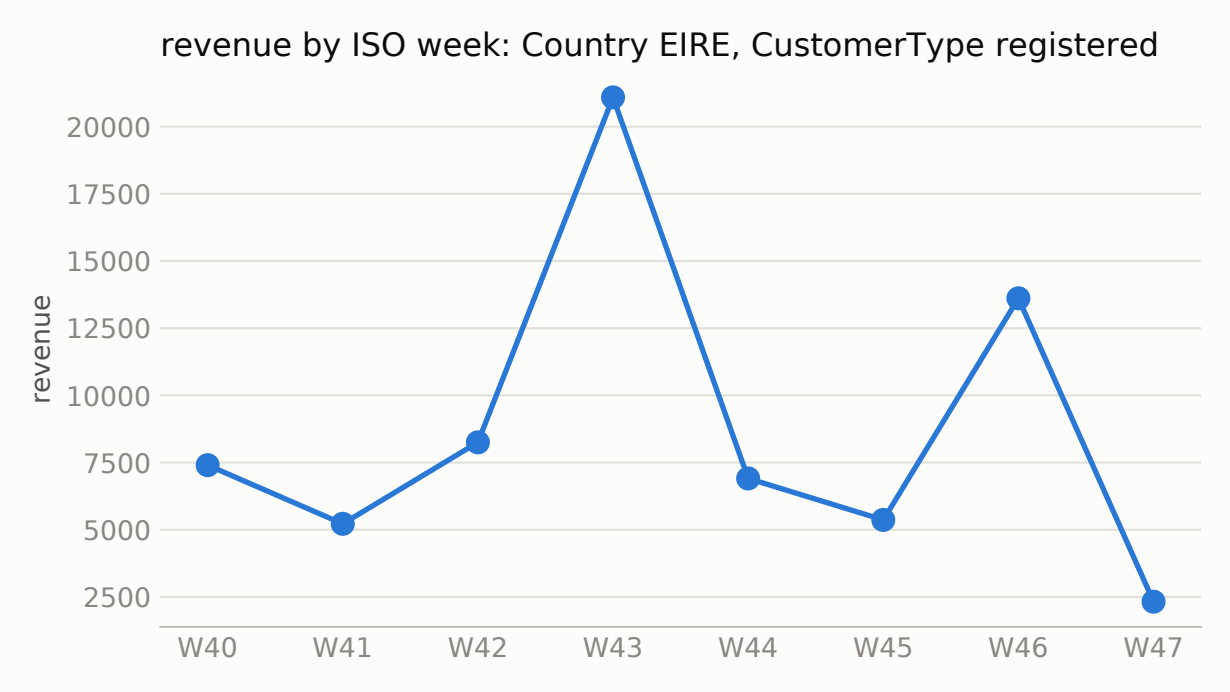

Chart description: Line of revenue by ISO week for Country EIRE, CustomerType registered; the latest week is last.

Segment	Change
Other	-16,137.84
United_Kingdom	-12,015.47
EIRE	-11,893.46
France	-3,757.18
Germany	-562.96

Interpretation
Each row is one Country segment and its own change in revenue from the prior week.

Risks, caveats and data quality

Appendix A. Metric definitions

Metric	Definition	Owner	Includes and excludes	Version and checksum

revenue	Sum of Quantity times Price in the period, in pounds.	Retail analytics	Includes: All invoice lines with a date.. Excludes: Lines with no quantity or price..	Version 1. Checksum 445a65074da5feb8969e65589a67d26032ac5b07e013b397764ef047dcce601.
units	Absolute quantity of items on invoice lines in the period.	Retail analytics	Includes: All invoice lines with a date.. Excludes: Lines with no quantity..	Version 1. Checksum 445a65074da5feb8969e65589a67d26032ac5b07e013b397764ef047dcce601.
return_rate	Share of invoice lines on cancellation invoices.	Customer operations	Includes: All invoice lines.. Excludes: None..	Version 1. Checksum 445a65074da5feb8969e65589a67d26032ac5b07e013b397764ef047dcce601.

Appendix B. Data tables

Chart 1 data: return_rate by ISO week: Country EIRE, CustomerType registered

Week	return_rate
W40	0.02
W41	0.00
W42	0.03
W43	0.00
W44	0.04
W45	0.00
W46	0.01
W47	0.07

Chart 2 data: return_rate by ISO week: Country Germany, CustomerType registered

Week	return_rate
W40	0.07
W41	0.11
W42	0.02
W43	0.02
W44	0.05
W45	0.09
W46	0.09
W47	0.01

Chart 3 data: revenue by ISO week: Country EIRE, CustomerType registered

Week	revenue
W40	7,402.60
W41	5,219.94
W42	8,252.29
W43	21,090.23
W44	6,908.76
W45	5,364.63
W46	13,612.07
W47	2,321.56

Appendix C. Method and checks

Code computes every number in this report from the source snapshot. The language model wrote only the text fields.
Each shown number is checked against an independent recompute before the report is issued.
Each chart has a written description and its data table in Appendix B.
